## Cuthbert Cancer Foundation Pledges \$250,000 to Abramson Cancer Center

This past spring, the Cuthbert Cancer Foundation donated \$50,000 to the Abramson Cancer Center at the University of Penn and established the Bud Cuthbert Research and Patient Care Fund. This fund will be used specifically to advance the work performed by Drs. Joseph Friedberg and Stephen Hahn to investigate mesothelioma and help patients navigate their way through the obstacles that are associated with this disease.

To maximize the efforts of the Abramson Cancer Center against mesothelioma, the Cuthbert Cancer Foundation has pledged \$250,000 over the next 5 years.

As a result of establishing the Bud Cuthbert Research and Patient Care Fund, the Cuthbert Cancer Foundation was recently awarded the Distinguished Partners in Hope Award by the University of Penn.

### Mesothelioma Facts

- Is a cancer caused by exposure to asbestos.
- Symptoms usually develop 25 to 30 years after exposure.
- Approximately 2500 cases are diagnosed in the US each year.
- 50% of patients have life span of 1 year or less.
- Average maximum life span is 3 years.

There is currently NO cure.
